External Guide	:	

SAVITRIBAI PHULE PUNE UNIVERSITY

Academic Year: **2019-20**

Fourth Year of Information Technology (2015 Course)

414460: Project Phase-I

Teaching Scheme:

Credits: 02

Examination Scheme:

TUT: 02 Hours/Week

OR: 50 Marks

Prerequisites:

1. Project Based Seminar.

Course Objectives:

1. Student should be able implement their ideas/real time industrial problem/ current applications from their engineering domain.
2. Students should be able to develop plans with help of team members to achieve the project's goals.
3. Student should be able to break work down into tasks and determine appropriate procedures.
4. Student should be able to estimate and cost the human and physical resources required, and make plans to obtain the necessary resources.
5. Student should be able allocate roles with clear lines of responsibility and accountability and learn team work ethics.
6. Student should be able to apply communication skills to effectively promote ideas, Goals or products.

Course Outcomes:

By the end of the course, students should be able to

1. To show preparedness to study independently in chosen domain of Information Technology and programming languages and apply their acquired knowledge to variety of real time problem scenarios.
2. To function effectively as a team to accomplish a desired goal.
3. An understanding of professional, ethical, legal, security and social issues and responsibilities related to Information Technology Project.

Contents

Project Based Seminar (PBS) helped students to gather, organize, summarize and interpret technical literature with the purpose of formulating a project proposal in third year. Students had also submitted a technical report summarizing state-of-the-art on an identified domain and topic in third year. B.E. Projects can be application oriented and/or will be based on some innovative/ theoretical work. In Project Phase-I the student will undertake project over the academic year, which will involve the analysis, design of a system or sub system in the area identified earlier in the field of Information Technology and Computer Science and Engineering. In some cases; if earlier identified project is not feasible; a new topic must be formulated in consultation with the guide and project coordinator. The project will be undertaken preferably by a group of 3-4 students who will jointly work and Implement the project. The group will select a project which is based on seminar delivered in relevant domain in Project based Seminar activity with approval from a committee formed by the department of senior faculty to check the feasibility and approve the topic.

Guidelines for Students and Faculty

- The Head of the department/Project coordinator shall constitute a review committee for project group; project guide would be one member of that committee by default.
- There shall be two reviews in Project phase –I in semester-I by the review committee.
- The Project Review committee will be responsible for evaluating the timely progress of the projects.
- As far as possible Students should finalize the same project title taken for Project Based Seminar (PBS).
- Student should Identify Project of enough complexity, which has at least 4-5 major functionalities
- Student should identify stakeholders, actors and write detail problem statement for system
- Review committee should revisit “Feasibility Review” conducted by Examiners during Oral examination in Third year in first week after commencement of the term.
- Review committee should finalize the scope of the project.
- If change in project topic is unavoidable then the students should complete the process of
- Project approval by submitting synopsis along with the review of important papers. This new
- Project topic should be approved by review committee.
- The students or project group shall make presentation on the progress made by them before the committee.
- The record of the remarks/suggestions of the review committee should be properly maintained and should be made available at the time of examination.
- Each student/group is required to give presentation as part of review for 10 to 15 minutes followed by a detailed discussion.
- Students should Revisit and Reassess the problem statement mentioned in the project-based seminar activity.

Review 1: Synopsis –

Deliverables:

1. The precise problem statement/title based on literature survey and feasibility study.
2. Purpose, objectives and scope of the project.
3. List of required hardware, software or other equipment for executing the project, test Environment/tools, cost and human efforts in hours.
4. System overview- proposed system and proposed outcomes.
5. Architecture and initial phase of design (DFD).
6. Project plan 1.0.

Review 2: SRS –

Deliverables:

1. SRS and High level design
2. Detail architecture/System design/algorithms/techniques

3. At least 30-40% coding documentation with at least 3 to 4 working modules

4. Test Results

5. Project plan 2.0

One paper should be published in reputed International conference/International journal based on project work done.

Project report contains the details as Follows:

Contents

List of Abbreviations

List of Figures

List of Graphs

List of Tables

1. Introduction and aims/motivation and objectives
2. Literature Survey
3. Problem Statement/definition
4. Project Requirement specification
5. Systems Proposed Architecture
6. High level design of the project(DFD/UML)
7. System implementation-code documentation-algorithm, methodologies, protocols used.
8. GUI/Working modules/Experimental Results
9. Project Plan
10. Conclusions
11. Bibliography in IEEE format

Appendices

- A. Plagiarism Report of Paper and Project report from any open source tool
- B. Base Paper(s)
- C. Tools used
- D. Papers Published/Certificates
- E. Use appropriate plagiarism tools, reference managers, Latex Lyx/latest Word for efficient and effective project writing.
 - Use appropriate plagiarism tools, reference managers, Latex Lyx/latest Word for efficient and effective project writing.

Term Work:

The term work will consist of a report and presentation prepared by the student on the project allotted to them.

Reference Books

1. UML2 Bible by Tom Pender, Wiley India Pvt. Limited 2011
2. Applying UML and Patterns Second Edition by Craig Larman, Pearson Education
3. UML 2 and the Unified Process, Second Edition, JIM Arlow, Ila Neustadt, Pearson
4. Design Patterns: Elements of Reusable Object Oriented Software, Erich Gamma, Pearson
5. Design Patterns in Java Second Edition by Steven John Metsker, Pearson

All the assignments should be conducted on Latest version of Open Source Operating Systems, tools and Multi-core CPU supporting Virtualization and Multi-Threading

Fourth Year of Information Technology (2015 Course)
414468: Project Work

Teaching Scheme:

Credits: 06

Examination Scheme:

TUT: 06 Hours/Week

TW Marks
OR: 100 Marks

Prerequisites:

1. BE-Project Phase I – Semester I.
2. Project Based Seminar.

Course Objectives:

1. The object of Project Work II & Dissertation is to enable the student to extend further the investigative study taken up under Project stage 1, either fully theoretical/practical or involving both theoretical and practical work, under the guidance of a Supervisor from the Department alone or jointly with a Supervisor drawn from R&D laboratory/Industry.
2. To expose students to product development cycle using industrial experience, use of state of art technologies.
3. To encourage and expose students for participation in National/International paper presentation activities and funding agency for sponsored projects.
4. Exposure to Learning and knowledge access techniques using Conferences, Journal papers and anticipation in research activities.
5. Evaluate the various validation and verification methods.
6. Analyzing professional issues, including ethical, legal and security issues, related to computing projects.

Course Outcomes:

By the end of the course, Students will be able to

1. Learn teamwork.
2. Be well aware about Implementation phase.
3. Get exposure of various types of testing methods and tools.
4. Understand the importance of documentation.

Contents

Review 3:

Based on Implementation (50% implementation expected)

Review 4:

Complete Project and Testing

All the groups should try to overcome all the lacunas identified by the external examiner during Project Phase I exam

The group will submit following at the end of semester II.

1. The Workable project.
2. Project report (in Latex/Lyx/latest Word) in the form of bound journal complete in all respect – 1 copy for the Institute, 1 copy for guide and 1 copy of each student in the group for certification.

The project report contains the details.

1. Problem definition
2. Requirement specification

3. System design details (UML diagrams)
4. System implementation – code documentation – dataflow diagrams/ algorithm, protocols used.
5. Test result and procedure – test report as per ATP.
6. Conclusions.
7. Appendix
 - a. Tools used
 - b. References
 - c. Papers published/certificates
 - d. Plagiarism Report of paper and project report from any open source tool

One paper should be published in reputed International conference/International.

INDEX

1. Undertaking by Students.
2. Group Details
3. Abstract Format
4. Weekly Log Report
5. Monthly Planning Sheet (Semester – I)
6. Project Review – I Check List
7. Performance Evaluation Sheet – I (Review – I)
8. Project Review – II Check List
9. Performance Evaluation Sheet – II (Review – II)
10. Monthly Planning Sheet (Semester – II)
11. Project Review – III Check List
12. Performance Evaluation Sheet – III (Review – III)
13. Project Review – IV Check List
14. Performance Evaluation Sheet – IV (Review – IV)
15. Evaluation Summery Sheet (Review – I to IV)
16. Participation in Project Competition.
17. Paper Publications. (If any)

SEMESTER - I

PUNE INSTITUTE OF COMPUTER TECHNOLOGY, Pune.

Department of Information Technology

UNDERTAKING BY STUDENTS

We, the students of B.E.I.T. are hereby assure that we will follow all the rules and regulations of SPPU related to the project work for the academic year 2017-18. The Project entitled-

will be fully designed and developed by us and no part of the project/full project will be designed and developed by any external entity or copied from some external resources. We are fully aware that copying or taking help of any external agency in the development of our project is totally unethical and illegal. The examiners have /University has full rights to initiate an action against us as per University norms if involved in unfair/illegal/unethical work.

(With effect from Academic Year 2018-19)

Rules & Regulations

1. All students must enter the correct information in the work book.
2. All the entries in the project work book must be verified by the concerned project guide.
3. Students must report to their respective guide on project day as per the time table.
4. Activities of the project work should be completed as per the project plan only.
5. Project group must submit soft copies of Project Abstract, Project Report and Publications in PDF format only.
6. Project group members submit **two** hard copies of Project Report in the format provided by department.
7. Project work book must be brought at the time of Project Reviews & Project Examination.
8. Any changes, if any, must be countersigned by the concerned project guide.
9. For project reviews and project examination, all students must report 15 minutes before the scheduled time.
10. For any query, concerned guide should be consulted.

REVIEW – I CHECKLIST : FINALIZATION OFSCOPE

25 Marks

PROJECT STATEMENT	
1. Is the statement short and concise (10-20 words maximum)?	Y / N / NA / NC*
2. Does the statement gives clear indication about what your project will accomplish?	Y / N / NA / NC*
3. Can a person who is not familiar with the project understand scope of the project by reading the Project Problem Statement?	Y / N / NA / NC*
REQUIREMENT: SCOPE AND OBJECTIVES	
Does the Scope and Objectives establish the "context" for the proposed project by referencing to the following elements:	
a. Are all aspects of the requirements document (i.e., Functional Spec.) addressed in the design?	Y / N / NA / NC*
b. Is the architecture / block diagram well defined and understood?	Y / N / NA / NC*
c. The project's objective of study(what product, process, resource etc.) is being addressed?	Y / N / NA / NC*
d. The project's purpose: is the purpose of project addressed properly (why it's being pursued: to evaluate, reduce, increase, etc.)?	Y / N / NA / NC*
e. The project's viewpoint: Is the project's viewpoint is understood? (Who is the project's end user)?	Y / N / NA / NC*
f. Is the project goal statement is in alignment with the sponsoring organization's business goals and mission?	Y / N / NA / NC*
ANALYSIS	
1. Is information domain analysis complete, consistent and accurate?	Y / N / NA / NC*
2. Is problem statement categorized in identified area and targeted towards specific area therein?	Y / N / NA / NC*
3. Are external and internal interfaces properly defined?	Y / N / NA / NC*
4. Does the Use Case Model properly reflects the actors and their roles and responsibilities?	Y / N / NA / NC*
5. Are all requirements traceable to system level?	Y / N / NA / NC*
6. Is similar type of methodology / model is used for existing work?	Y / N / NA / NC*
7. Are requirements consistent with schedule, resources and budget?	Y / N / NA / NC*

REVIEW – II CHECKLIST : DESIGN

25 Marks

DESIGN	
1. Are requirements reflected in the system architecture?	Y / N / NA / NC*
2. Does the design support both project (product) and project goals?	Y / N / NA / NC*
3. Does the design address all the issues from the requirements?	Y / N / NA / NC*
4. Is effective modularity achieved and modules are functionally independent?	Y / N / NA / NC*
5. Are structural diagrams (Class, Object, etc.) well defined and understood?	Y / N / NA / NC*
6. Are all class associations clearly defined and understood? (Is it clear which classes provide which services)?	Y / N / NA / NC*
7. Are the classes in the class diagram clear? (What they represent in the architecture design document?)	Y / N / NA / NC*
8. Is inheritance appropriately used?	Y / N / NA / NC*
9. Are the multiplicities in the use case diagram depicted in the class diagram?	Y / N / NA / NC*
10. Are behavioral diagrams (use case, sequence, activity, etc.) well defined and understood?	Y / N / NA / NC*
11. Is aggregation/containment (if used) clearly defined and understood?	Y / N / NA / NC*
12. Does each case have clearly defined actors and input/output?	Y / N / NA / NC*
13. Is all concurrent processing (if used) clearly understood and reflected in the sequence diagrams?	Y / N / NA / NC*
14. Are all objects used in sequence diagram?	Y / N / NA / NC*
15. Does the sequence diagram match class diagram?	Y / N / NA / NC*
16. Are the symbols used in all diagrams correspond to UML standards?	Y / N / NA / NC*
